

## REPORT - GEOR001660

## Unconfined compressive strength of intact rock and salt core specimens (According to ASTM 7012 D)

## (The test performed according to Lab procedure № 1200)

| No.                          | BS - 21 |
|------------------------------|---------|
| Depth of tested specimen, m. | -       |

| Project No.      | 609029          |
|------------------|-----------------|
| Project Name     | Kokhav Hayarden |
| Date of sampling | -               |
| Date of testing  | 04/07/2018      |

| Rock description: | Amygdaloidal Basalt |
|-------------------|---------------------|
|-------------------|---------------------|

## Note:

| Х | The test was performed at natural moisture content. |    |       |
|---|---|----|-------|
|   | The test was performed after saturation of          | 48 | hours |

| Specimen conditions:     |                   | Initially | After<br>Saturation |
|--------------------------|-------------------|-----------|---------------------|
| Wet Mass                 | gr                | 338.30    |                     |
| Diameter                 | cm                | 4.80      |                     |
| Length                   | cm                | 9.80      |                     |
| Area                     | cm <sup>2</sup>   | 18.05     |                     |
| Height to diameter ratio |                   | 2.04      |                     |
| Dry Unit Weight          | kg/m <sup>3</sup> | 1739      |                     |
| Water content            | %                 | 10.0      |                     |
| Void Ratio               | -                 | -         | -                   |
| Water Absorpsion         | %                 | -         | -                   |

| Test Results:                            |      |
|--|------|
| Maximal Applied Force<br>in failure, kN: | 14.5 |
| Unconfined Compressive Stress            | 8.03 |
| in failure, MPa :                        | 3.00 |

| Test Conditions:                  |     |
|-----------------------------------|-----|
| Test Time t, sec                  | 251 |
| Temperature during the test T, C° | 25  |

Performed by:

Andrey Makeev Lab. Technician

- 1. This report is the sole property of the Building and Infrastructure Lab Ltd until the Client has fulfilled all his obligations toward the Lab.
- 2. The results pertain to the tested sample material only.
- 3. This report should be taken as one whole report and not to be copied or published in parts or pieces of any kind.
- 4. The data and details of sampling/ testing are according to the information as provided by the client or his representative.
